

Install Oh-My-Zsh In Ubuntu, Arch Linux And Fedora

By **Enock Seth Nyamador**

[Oh-My-Zsh](#) is an open source, community-driven framework for managing your ZSH configuration. It comes bundled with a ton of helpful functions, helpers, plugins, themes, and few things that make you shout... **"OH MY ZSHELL!"**.

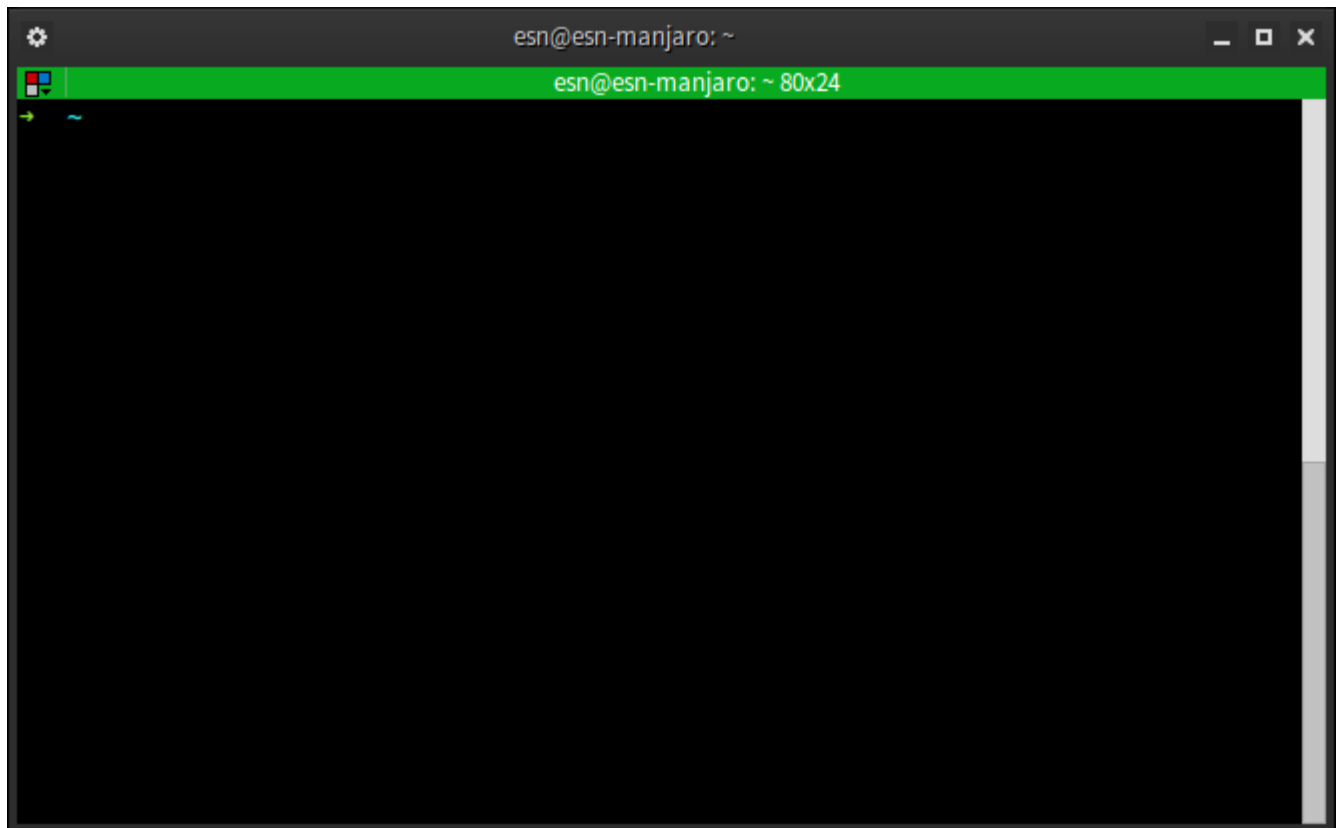

Fig 1 above show oh-my-zsh running in [Terminator](#)

Install ZSH

oh-my-zsh should work with any recent release of **zsh**, the minimum recommended version is 4.3.9.

First you need to install ZSH. If not installed just fire up your terminal and do now.

Fedora:

```
sudo yum install zsh
```

Arch Linux/ Manjaro:

```
sudo pacman -S zsh
```

Ubuntu, Linux Mint, Debian:

```
sudo apt-get install zsh
```

Install Oh-My-Zsh

Automatic Installation

This can be done via **`curl`** or **`wget`**.

Open Terminal,

via **`curl`**:

```
curl -L http://install.ohmyz.sh | sh
```

via **`wget`**:

```
wget --no-check-certificate http://install.ohmyz.sh -O - | sh
```

Manual Installation

1. Clone the repository

```
git clone git://github.com/robbyrussell/oh-my-zsh.git ~/.oh-my-zsh
```

1.a. If you already have an existing `~/.zshrc` file, create a backup:

```
cp ~/.zshrc ~/.zshrc.orig
```

3. Create a new zsh config by copying the zsh template we've provided.

```
cp ~/.oh-my-zsh/templates/zshrc.zsh-template ~/.zshrc
```

4. Set zsh as your default shell:

```
chsh -s /bin/zsh
```

5. Restart ZSH.

Also take a look the various [themes](#) and [plugins](#) to make your terminal look good.

Enjoy.
